i love fireworks and i really enjoyed this game. If i save a custom effect it glitches once in a while but i don't have problems with that because the next time i press save it does work. What i really dislike is that it won't show the effect of the high mortarsHELLS anymore. I tried reïnstalling 3 times but that still doesn't work. You can see the shell going off because of the glow on the landscape. I tried different resolutions and qualitysettings. (ps my PC runs ARMA3 on ultra settings so it's strong enough for a fireworksim...). Gameplay is awesome and i love tha fact that you can upload your own music. I only recommend games that are properly fixed so a no for me (when the game is stable i will recommend it).. This is nothing but a glorified motherboard commercial. All you do is sit down and look at the bad graphics. That's it. I suppose if you've never seen a single thing in VR before it would be kinda cool, but to everyone else it's boring as hell.. Not worth the money. Neither Viking nor Metal.. Really cute game :3. There is literally nobody playing this game. You no longer can play it. Don't buy it. You will be wasting your money. Looks really fun, but not playable, so **DO NOT BUY**.. Very ambitious concept with an attempt to demonstrate what cinematic VR films can be like. Good camera work, lighting and overall atmosphere. But notable its weakest link was in the many opportunities missed in expressing emotion in the characters facial animation. Early scenes suffered from feet clipping into the ground as well. A good soundtrack but again voice acting felt a bit lack lustre. I felt moments that were meant to have strong impact did not resonate with me because of the voice acting and facial animation. Overall I enjoyed it and would like to see more of this content in the future.. I will make this short, this game is dead.

Do not buy it.

The gameplay does not save it.

It is too expensive. Don't buy this. It's not finished, there's many flaws. Save your money and get Crazy Machines 2.

Amazing Game! I can't stop playing. Beautiful visuals, amazing sound. A must play. So glad it got ported over to steam, I was getting jealous of my friends with a wiiu.. How did this garbage even get into my steam account?. Of all Q2-Engine games this will remain the last unfinished for me. The concept is great, however even due to nice patching of the community and running on modern hardware, there are plenty of annoying flaws, which makes this one really unenjoyable for me.

1. Mouse speedup random. look to any direction a little faster and see how you do all of a sudden 90\u00b0 view changes
2. Leveldesign: Meh, just meh. Remember, when I read in the 90s, that from 2nd stage (greece), it becomes better. Indeed a little, but after nice 3-4 levels again we are stuck in a "find the 5th f\*cking key" pleb.
3. your partners are always stuck. everywhere. it sucks. I mean - i know i could disable this in v1.3, so just me and the game. but hey, that is how it was designed...
4. enemy location: open a door, boom you are dead, go with a lift: boom you are dead. at least, at times you get squished by some automated door, when you try to get your partner....

no, I gave this a big chance to win my heart and complete the q2 era. but I won't and John Romero should really be ashamed for this title, which made it clear, that he was not the genius, people made him back then.. Fun game. I just hope they release a real jagged alliance game soon.. not even at 90% off. Poor gameplay, graphics, controls, camera, and game.
